Experience

Software Engineer - Disqus 2016

Used React to build publisher installation flow, moderation tools, and analytics tools to increase publisher satisfaction.

Started transition of admin site's state management from custom higher order components to Redux.

Implemented features in Backbone and vanilla JavaScript for a platform used by millions of commenters.

Participated in Disqus' hiring process, performing interviews and phone screens for an open front end developer position.

Software Engineer - Magnifi 2015 - 2016

Developed client-side features using Ember.js, ES6, Sass, and Handlebars.

Worked closely with design and product teams in an agile environment to discuss and implement solutions to user interface problems through a rebranding and a UI overhaul.

Worked with an A/B testing framework to make effective changes to Magnifi's registration page.

Worked on event ingestion on Magnifi's Rails server using TDD.

Co-founder & Lead Developer - Music Putty 2013 - 2015

Developed a music web application for independent musicians to gain exposure and revenue through crowdfunding, donations, and free streaming.

Implemented client application and server using Angular.js, Node.js, MySQL, and Amazon Web Services.

Trained developers to contribute to the project and, in doing so, gre management, communication, and interdisciplinary collaboration skills.

Developer - FreeSound Synth 2014

Built a granular synthesizer using FreeSound API and Web Audio API.

Internet Director - KCPR 2012 - 2013

Developed website for Cal Poly's community Radio Station, KCPR, in use from 2012-2014. Helped to develop a subsequent iteration of the site.

Education

2015: Cal Poly, SLO

Interdisciplinary BA in Computer Science and Music through LAES.
